

Optocape is a optical signal buffer cape, with integrated LVDS transmitter for BeagleBone Black Rev C.

FEATURES:

- 15 high-speed outputs (TLP2200)
- 4 relay outputs (TLP222A)
- 10 high-speed inputs (FOD817)
- LVDS video output (SN75LVDS83B)
- Isolated UART serial port
- Cut-out for access to BBB serial debug port
- 4 analog inputs

Note: Analog and LVDS pins are not isolated
